

# Before you grab your popcorn, make sure you're setup to view the film with us!

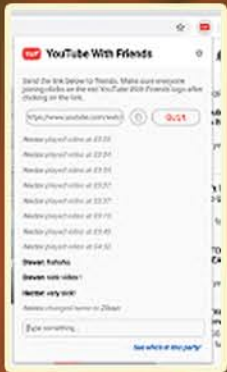

1

We'll be viewing the film from the Chrome desktop/laptop browser (no phones or tablets in this theater either!) First, download and install the Chrome browser if you don't already have it:

Link: <https://www.google.com/chrome/>

Once Chrome is open, download the YouTube With Friends extension that will allow you to access our virtual viewing "room" with chat: It will look like the pop-up box to the left.

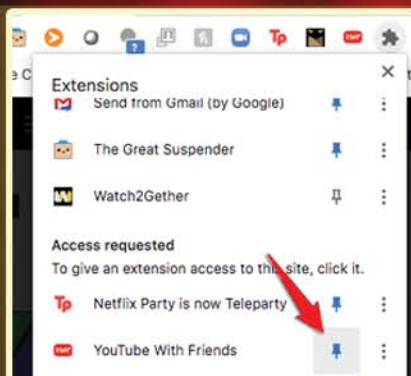

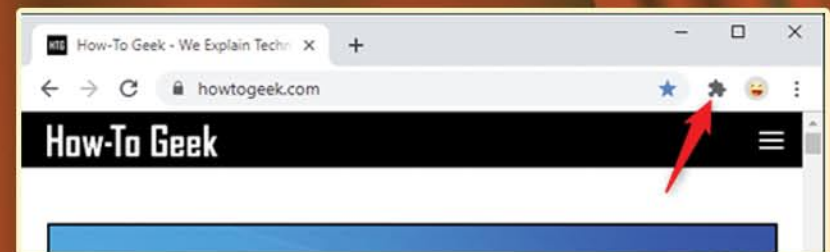

Link: <https://bit.ly/3oEH5KZ>

2

3

Now that the extension has been installed, you can find it either on your Chrome browser tool bar to the right of the address bar, or under the extension drop-down menu. Click the puzzle piece icon and scroll down to the YouTube With Friends button 

Click on the gray pin icon (it'll turn blue) which will bring it up to the tool bar as shown on the left. Now, click on the YWF button  to activate it.

4

5

Now lets get your movie ticket! You will need to be signed into your YouTube account to rent the film before the night of the movie. Go to this link to the film trailer for the movie:

<https://www.youtube.com/watch?v=C0FnJDhY9-0>

Then click on the "Buy or Rent" button in the upper right corner of your browser. It's \$3.99 for the standard rental. Once paid for you have 30 days to view and 48 hours once you click play. You have unlimited viewings, but for now wait for Step 6...

Log into our Zoom waiting room session to receive the entrance link that will allow you to access the group chat via the YouTube With Friends tool. Once you have the link and the film open in Chrome, click on the YWF button in your browser window and the chat window will open. You can't use this tool while in full screen mode, but click on "Theater Mode" to get the largest window while in the YWF chat. If the chat window closes, just reopen by clicking the  button again. Now sit back and enjoy the film!
